The Greenlight Asset Registry provides accurate, real-time, as-built documentation. Track critical project data, including the number of devices installed, commissioned, and verified—all in one place. Trusted by hundreds of contractors each year, it's the industry's simplest, most intuitive application.

Use the GreenLight mobile app to easily update device data. Press and hold any device in the app to view detailed meta-data and input MAC addresses and serial numbers. With interactive floorplans, tracking punch lists has never been easier.

Contact Greenlight IoT today for pricing details.

Available on both iOS and Android.

KEY FEATURES

Remote Commissioning & Live Punch Lists

Configure assets remotely with real-time punch list updates.

Mobile App for On-Site Teams

Easy barcode scanning and asset recording via mobile devices.

Optional Project Workbook

Streamlines the uploading of MAC addresses. Works seamlessly with removable sticker barcodes. Our patented workbook makes tracking simple and reliable. It allows the upload of hundreds of devices in minutes with instant, as-built creation.

Digital As-Built & Punch List Access

Instantly generate and view digital as-builts and live punch lists on an interactive floor plan.

Cloud-Based Dashboard

Track project progress. Easily see installation, commissioning, and verification status for all networked systems.

Procore Integration **PROCORE**

Download punch lists and see the project's progress directly from the Procore application.

BENEFITS

Eliminate Lost Documentation

Store all as-built documents and sticker maps digitally—no more lost or damaged files.

Accurate Digital As-Built Records

Accurate, real-time digital records ensure project integrity

Punch List Tracking at the Device Level

Allows real-time tracking of all outstanding punch list items.

Remote Configuration

Reduce costly on-site time with the ability to configure assets remotely.

Faster Multi-Contractor Install

Multiple contractors can scan and record barcodes simultaneously—and upload device-specific data in minutes.

Stakeholder Visibility

Allow stakeholders to track project progress and accuracy at every stage.

Future-Proof Asset Data Catalog

Future-proof your asset data for easy maintenance and upgrades.

Progressive Billing Support

Simplify billing with real-time visibility into install progress.

Steps

1. Download the Mobile App

Install the Universal Asset Registry mobile app on your device.

2. Pre-Loaded Plans

Our team will pre-load all project plans and device data. (Please allow 5–10 business days for setup—no technical skills needed.)

3. Select & Scan Devices

Choose the networked device you're installing and scan its barcode or QR code using the app.

4. Automatic Location Update

The system will automatically record the device's field location—no manual entry is required.

5. Need a Quick Walkthrough?

Scan the QR code in the app to access short YouTube videos explaining each step.
